

## Plunger and Dispenser Cans (Class Number 6055)

Plunger cans are intended to eliminate the hazard of open pans of flammable liquids on work benches or machines where it is necessary to moisten a sponge or swab with these liquids. When the dasher is depressed, liquid is forced up through the hollow plunger and moistens the flame screen in the concave receiving pan. The pan and screen are made in various sizes depending on the quantity of liquid desired. Sizes range from one pint through two gallons (0.5 through 8 L).

A dispenser can includes a spout containing a normally closed spring-loaded valve. The can is held inverted and the spout assembly is depressed to dispense a small quantity of solvent on the work for cleaning/swabbing operations.

### Cat. Nos. 10008, 10018, 10108, 10118, 14018, 10143, 10141, 10208, 10218, 10308, 10318

Plunger Can. Cat. Nos. 10008, 10018, 1 pt (0.5 L); 10108, 10118, 14018 (non-metallic), 1 qt (1.0 L); 10143, 10141, 2 pt (1.0 L); 10208, 10218, 1/2 gal (1.9 L); 10308, 10318, 1 gal (4 L).
